Mommy Lingual

In Mommy Lingual class, children learn the rhythms and sounds of English from music - sometimes using American Sign Language. It is a fifty minute class including arts & craft, story time and circle time. We believe that at this age and indeed from the age of zero, it is invaluable to take advantage of toddler's phenomenal memory skills. Even though they may not be able to produce the words, they will be learning English much faster than older children. This is an important time to lay a good foundation for the future.
